

## ITECH'MER, new sea Technologies Convention is coming on board!!

25th -27th October 2007  
Exhibition Centre - Pays de Lorient - France

ITECH'MER Lorient 2007, the 7<sup>th</sup> new sea technologies convention, is a unique and international event dedicated to fishing, workboats, shipbuilding and repairs. ITECH'MER Lorient exhibitors will take this opportunity to show their last technologies as equipments (electronics detection, energy saving) much as services (broker, environment & oceanography, internet trading ...).

At the same time, there will have many conferences in relation with currently items; an overview:

- **Safety:** French Maritime safety (I.M.P.) will intend to do a special training about unique safety document and a debriefing on international ERGOMARE workshop.
- **Energy saving:** this item is the main focus on fishing boats, IFREMER will propose a debate about works on the way in relationship with engine and fuel providers.
- **Eco label :** Focus on a topic hugely interesting professionals and consumers, European experts will debate on different solutions and measures adapted by ship- owning, fisheries, purchase centres and various association in order to consume products catch in a responsible and durable way.
- **Nutrition-Health:** Medical and Scientifics experts will display links between health and seafood consumption. Clinic and Scientifics progress will be explained.

ITECH'MER Lorient exhibition is set up by SEGEPEX/PARC des EXPOSITIONS du PAYS de LORIENT.
